SOULSCRIPT

CORE FEATURES

(a) **Customizable Opening Prompt(Editable Dear diary Prompt)**

When user creates entry, they start with "Dear [Name]
is user defined e.g dear mom, dear me, dear future self
User can change this overtime

(b) Offline first Access

Site support offline journaling: users can write and save
entries without internet and sync when back.
No text character limit in the offline version.
To put video and audio entries, must be online.

© Privacy and security

Strong encryption for user data(at rest and in transit)
Users control their data- export, delete anytime.
No selling user data, no ads.

(d) Legacy Mode

Users can mark entries or the entire journal as "Legacy"
to be shared with trusted contacts after a certain event.
A user can grant access to a loved one. Preferably
somebody we can find through an email account to
link him with the user.

(e) Guided Prompts and Emotional Support

Optional daily or weekly prompts to help users reflect
deeply.
Incorporate calming UX elements to foster a safe
emotional space.

(f) Anonymous Community

Users are private by default. They can opt to be
either public or semi - private. Auto blurred profiles.
Public users can share their individual entries anonymously
(character and time limit in texts, audio and photos. No
videos in the public space)
Semi private users only engage passively, they follow
through the entries posted by the public users
No likes, no followers, "an echo button" from a user
with the same emotion is preferred instead. It
indicates, "I felt that too."

Comments, if any, must be one word per user per post e.g "Hope", "Ouch", "Peace"......
Emotional hashtags used on personal entries connect users who feel the same way in the public space. Users tag entries with emotion based hashtags like #Grief, #Joy, #Confused
Both public and semi private users can discover posts through shared emotional tags. Somebody posting with #Lonely will see entries from others under the same tag..
Default users are not engaged in any way with the public space.
An exception occurs only when they accept the quarterly virtual digital diary event invitation. This is optional to every user.

(g) AI integration
Can be used in generalized texts, check mood, weekly or monthly updates about the most common emotions expressed by a user, if there is an improvement from a negative emotion or a steady positive emotion based on user choice of journaling words.
Above all, responsible for exporting structured entries yearly as an autobiography. Could be entitled, "Me in 2025" or any other title chosen by the user.
It should not exceed five words e.g , "To My 40-Year -Old Self"

(h) Multi- Platform sync (future phase)
Sync journals across devices : Phone, tablet,desktop
